Profile *Refresh*

Your skin reflects your daily life - 100% active! You may have noticed that your skin is showing some signs of aging: a more tired, stern or sad look, more wrinkles and crow's feet, and the skin is less radiant and firm. You just want to give it a hand to glow again, something natural and light so that your skin stays as spry as your spirit.

Your mantra

A sunny, natural beauty... Who does not want to maintain a clear, tight skin despite having a super busy job, a busy family life and perhaps too short nights?

Your collagen level

Collagen and elastin fibers become thinner and less tight as you age. Your skin is less elastic, which can cause wrinkles and crow's feet to appear. Furthermore, this can also cause the skin to gradually become saggier.

Your wish

Your main desire is to maintain and improve your internal collagen production to combat the first signs of aging.

Your skin's needs

- Stimulation of collagen and elastin
- Deep hydration and reduction of superficial wrinkles
- Improve or maintain the skin tone and radiance

Your allies: The Collagen Force

Your Collagen Force ally is RADIESSE®. This bio-stimulating filler can refresh and help prevent visible signs of skin aging – which seems to be an ideal match for you. Be sure to discuss all options with your treating physician, who can best advise you.

RADIESSE® Plus

A calcium-based structural filler that has a lifting effect and encourages collagen and elastin production. It is ideal for treating areas of the face that need precise correction and tighter contours.

LEARN MORE ABOUT RADIESSE® PLUS

RADIESSE®

Calcium-based filler product that triggers collagen production to restore skin firmness and improve its quality, as well as its overall appearance, without having a volumizing effect.

LEARN MORE ABOUT RADIESSE®

BELOTERO Revive®

This reticulated hyaluronic acid, in combination with glycerol, forms a booster for the skin that promotes hydration of the superficial layers. BELOTERO® Revive nourishes your skin like a "bath of oligo-elements" and improves texture and radiance.

LEARN MORE ABOUT BELOTERO®REVIVE

ULTHERAPY®

Achieve skin lifting through ultrasound against sagging skin with ULTHERAPY®. This treatment uses energy from high-intensity focused ultrasound (HIFU) to create controlled heat zones in the deep dermis. These heat zones stimulate collagen and elastin fibers to rebuild and multiply, restoring your skin's firmness without needing surgery or social isolation.

LEARN MORE ABOUT ULTHERAPY®

Beneficial effects

Immediately glowing skin and looking rested, as if you had two weeks of vacation!

And an improvement in skin quality and firmness thanks to collagen support.

10 ways to boost your collagen production

1. Apply sunscreen with SPF 30 or higher every morning.
2. Eat plenty of fruits and vegetables that are naturally rich in antioxidants.
3. Maintain a regular beauty routine that focuses mainly on cleansing and moisturizing.
4. Sleep 7 to 9 hours a night for a well-rested complexion.
5. Choose stress-reducing activities (yoga, meditation, contact with nature...).
6. Choose a healthy lifestyle: do not smoke and do not drink alcohol (anymore), exercise regularly.
7. Drink plenty of water for good hydration.
8. Consider dietary supplements with collagen.
9. Maintain a balanced diet with enough lean protein and keep your intestinal flora balanced.
10. Consult with your cosmetic doctor about possible treatments.

Profile REVIVE

Your skin looks young! Perhaps you detect slight signs of aging, but do not want beauty treatments such as fillers or treatments that add volume. Still, you want to maintain or improve the natural radiant quality of your skin.

LEARN MORE ABOUT THE REVIVE PROFILE

Profile REFINE

You may see and feel that your skin has changed: less elastic and firm, noticeably saggier skin of the face, as well as of the body. Perhaps you have noticed incipient drooping cheeks or less full cheekbones and you want to restore beautiful volume and contour to your face.

LEARN MORE ABOUT THE REFINE PROFILE

Profile REGENERATE

You have mature skin that has lost volume and density over time. The signs of aging are more visible: the bottom of your face – oval, jawline – as well as the top (eyebrows, eyelids) start to droop, volumes fade. The skin on the neck, hands and cleavage also changes. Perhaps you have considered surgical lifting to restore volumes and tighten your skin?

LEARN MORE ABOUT THE REGENERATE PROFILE
