

PROFILE REGENERATE

You have mature skin that has lost volume and density over time. The signs of aging are more visible: the bottom of your face - oval, jawline - as well as the top (eyebrows, eyelids) start to droop, volumes fade. The skin on the neck, hands and cleavage also changes. Perhaps you have considered surgical lifting to restore volumes and tighten your skin.

Your mantra

You feel younger and want to look that way! With a targeted facial and/or neck and décolletage treatment, you can slow down your skin's aging process for sublime beauty.

Your skin's needs

- 360° regeneration: restoration of volumes and revitalization of the deep layers of the dermis of the face and body
- Lifting or restoring the shape of volumes and contours – improving or restoring volumes and structures
- Rejuvenation of the skin of the face, neck, décolleté and hands

Your collagen level

Decrease in cell activity, low production of collagen and elastin fibers resulting in sagging contours and loss of volume. In women, hormone fluctuations can cause skin to become drier and look different.

Your wish

Your main desire is an overall improvement in skin quality, radiance, texture, density and elasticity, both of the face and neck and hands in order to undo aging skin.

The needs of your skin.

Your skin's needs

- 360° regeneration: restoration of volumes and revitalization of the deep layers of the dermis of the face and body
- Lifting or restoring the shape of volumes and contours – improving or restoring volumes and structures
- Rejuvenation of the skin of the face, neck, décolleté and hands

Your allies: The Collagen Force

Your Collagen Force allies are ULTHERAPY® and RADIESSE®. Certainly a combination treatment is worth considering, given that your skin probably does deserve some thorough attention for recovery. Be sure to discuss all options with your treating physician, who can best advise you.

ULTHERAPY®

Lifting through ultrasound against sagging skin with ULTHERAPY®. This treatment uses energy from high-intensity focused ultrasound (HIFU) to create controlled heat zones in the deep dermis. These heat zones stimulate collagen and elastin fibers to rebuild and multiply, restoring your skin's firmness without surgery or social isolation.

LEARN MORE ABOUT ULTHERAPY®

RADIESSE®

Calcium-based filler product that triggers collagen production to restore skin firmness and improve its quality, as well as its overall appearance, without a volumizing effect.

LEARN MORE ABOUT RADIESSE®

RADIESSE® PLUS

A calcium-based structural filler that has a lifting effect and encourages collagen and elastin production. Ideal for treating areas of the face that need precise correction and tighter contours.

LEARN MORE ABOUT RADIESSE® PLUS

BELOTERO® REVIVE

This reticulated hyaluronic acid, combined with glycerol, forms a booster for the skin that promotes hydration of the superficial layers. BELOTERO® REVIVE nourishes your skin like a "bath of oligo-elements" and improves texture and radiance.

LEARN MORE ABOUT BELOTERO® REVIVE

Beneficial effects

You look noticeably younger! A re-tightened facial oval and a restored jawline with radiant skin thanks to restoration of the deep layers of the dermis and underlying tissues. Long-term firming and hydration of the skin.

A lifting effect without surgery!

10 ways to boost your collagen production

1. Apply sunscreen with SPF 30 or higher every morning.
2. Eat plenty of fruits and vegetables that are naturally rich in antioxidants.
3. Maintain a regular beauty routine that focuses mainly on cleansing and moisturizing.
4. Sleep 7 to 9 hours a night for a well-rested complexion.
5. Choose stress-reducing activities (yoga, meditation, contact with nature...).
6. Choose a healthy lifestyle: don't smoke and don't drink alcohol (anymore), exercise regularly.
7. Drink plenty of water for good hydration.
8. Consider dietary supplements with collagen.
9. Maintain a balanced diet with enough lean protein and keep your intestinal flora balanced.
10. Consult with your cosmetic doctor about possible treatments.

Profile REVIVE

Your skin looks young! Perhaps you detect slight signs of aging, but do not want beauty treatments such as fillers or treatments that add volume.... Still, you want to maintain or improve the natural radiant quality of your skin.

LEARN MORE ABOUT THE REVIVE PROFILE

Profile REFRESH

Your skin reflects your daily life, 100% active! You may have noticed that your skin is showing some signs of aging: a more tired, austere or sad look, more wrinkles and crow's feet, and the skin is less radiant and firm. You just want to give it a hand to glow again, something natural and light, so your skin stays as spry as your spirit.

LEARN MORE ABOUT THE REFRESH PROFILE

Profile REFINE

You may see and feel that your skin has changed: less elastic and firm, noticeably saggier skin of the face, as well as of the body... Perhaps you have noticed incipient drooping cheeks or less full cheekbones and you want to restore beautiful volume and contour to your face.
